

Super Pump VS Efficient, Dependable, Proven

Hayward's bestselling Super Pump is now even better with the new energy saving variable-speed version.

The variable-speed model Super Pump VS takes efficiency to the next level with up to 80% energy cost savings.

The Super Pump VS is right-sized, particularly for applications with 1.5" plumbing.

Customizable speed, countdown timers and priming time matches the needs of both aftermarket and new construction. The digital interface shows real time power consumption in watts.

Upgrade and save with Super Pump VS!

On-Command Automation Controls

Choosing On-Command enables a full range of automation features. It allows the user to automate pool, spa and even ancillary backyard functions.

Pump, filter, heater, cleaner, pool, spa and landscape lighting, even water features can operate automatically, while swimmers concentrate on fun.

Set the pool's circulation schedule for off-peak electrical rates through the intuitive programming function and easy to read display.

Automating tasks with an On-Command can pay for the unit, by saving up to 75% on energy costs year after year while making pool ownership carefree and more affordable.

Hayward's Aqua Rite is #1 in the World

The Aqua Rite Chlorine Generator is the easiest way to sanitize a pool.

The Aqua Rite uses common salt and converts it into "free" chlorine. The chlorine sanitizes the pool water and then reverts back into salt that never wears out.

A newly designed Primary Control Board assures a robust system in the harshest environments. A teaspoon of salt per gallon of pool water and the Aqua Rite produces enough fresh chlorine (up to 1.45 lb per day) to keep a 40,000-gallon pool sparkling clean.

With Aqua Rite's continual shocking of the circulation stream, bothersome chlorine smell is eliminated and algae easily controlled.

TigerShark Robotic Pool Cleaner

Industry-leading technologies, such as our unique on-board computer and reinforced filter cartridge, help attack dirt and debris so your pool gets cleaned more effectively, efficiently and with less effort.

TigerShark robotic pool cleaners have self-programming computer technology to calculate the most efficient cleaning pattern, determine pool size and automatically powers down at the end of their cleaning cycle.

TigerShark brushes and scrubs while it vacuums, reaching everywhere, including the pool bottom, sides and stairs. With TigerShark, pool ownership is made easier with a perfectly clean pool ready to be enjoyed without effort by the pool owner.

Value Alternative for Quality Continuous Use Air Blowers

AIRTECH commercial blowers are ideally suited for spas, clubs or luxury villas which put a high demand on spa or pool aeration.

AIRTECH commercial blowers provide continuous operation that is impossible for a mushroom style blower. Built with rugged die cast aluminum construction and an outboard bearing, AIRTECH blowers run quieter and cooler than competing rotary blowers.

What's more, these blowers are value priced against other rotary blowers without compromising performance or reliability.

For public spa, pool and luxury pool applications, let AIRTECH blowers be your first choice in commercial blowers.

ProHayward Transformers Available for Immediate Shipment

ProHayward low voltage swimming pool transformers are the preferred transformer around the world.

12V/300W ProHayward Transformer

CE listed ProHayward transformers are designed to provide safe 12 volt electrical supply to underwater lights and low voltage fixtures of all types.

Advanced circuit protection resets automatically. The weatherproof housing features a separate wiring compartment for the fully encapsulated high and low voltage circuits.

Available in 300 & 600W as well as 12, 13 & 14V configurations. ProHayward transformers complement Hayward lighting choices.
