DEP500 Filter – Maintenance of a cartridge, Clarity of D.E. technology

DEP 500 Series pleated element D.E. filters are Hayward's first pool filters engineered with cartridge convenience and D.E. technology.

DEP500 with
SelectaFlo™ Valve

These pool filters provide superior water clarity and make maintenance simpler and faster than ever. Trusted D.E. filtration offers greater dirt-trapping capabilities, while a reduced number of pleats significantly decreases cleaning time.

Lower pleat count allows for reduced cleaning time. New D.E. technology ensures excellent water clarity.

Pleated
Elements

Heavy-duty, tamper-proof, one-piece clamp provides quick access to internal components without disturbing plumbing connections.

Flow rating is equivalent to grid D.E. and multiple element cartridge filters, making retrofit installation simple. Filter can be installed with or without a valve.

SelectaFlo™ High-Efficiency D.E. Filter Valve

HCP 4000 Series Commercial Pump

The Hayward HCP 4000 Series Pump is a self-priming pump that features a lightweight glass-fibre reinforced thermoplastic housing for effortless installation.

The pump has an impeller and diffuser, made from Noryl® and a large, non-corrosive plastic strainer basket extends the time between cleanings.

The transparent lid allows for easy inspection of the strainer basket, and its quick-release mechanism opens easily without tools. The TEFC motor design provides years of durable, reliable performance.

Available to ship from the US in 5.5 to 12.5 HP for 60Hz and 5.5, 7.5-12.5 HP for 50Hz.

Paramount UV2 – An additional layer of protection and sanitation

Water circulates through the Ultra UV2 chamber and the UV-C lamp immediately inactivates 99.9% of micro-organisms such as crypto, giardia and algae which are resistant to chlorine.

This provides a cleaner, clearer swimming environment with zero harmful by-products. Dramatically reduces the amount of chlorine needed to maintain an adequate level of residual sanitizer (a minimum residual level of chlorine or bromine should be maintained at all times).

Multi-directional & quick release piping connections make it easy to install in new and existing pools. 360° direct view lamp indicating ring lets you know the unit is on.

100% corrosion resistant housing. 2-year limited warranty.

Paramount is a Hayward company.

Hayward PSV Series Valves

Hayward PSV Series check valves and 2 way/3-way diverter valves make water flow management simple and maintenance-free.

Hayward valves are manufactured with NSF certification. All components are made of corrosion resistant materials allowing for improved performance over an extended life.

The diverter valves feature a patented handle for quick customization of valve ports.

3-way Valve

Check Valve

PSV Series valves are available in multiple materials, size and port

configurations to accommodate most new construction and aftermarket applications.

The PSV diverter valves are compatible with Hayward's 24V electric valve actuators as well as competitive brand actuators. [GVA-24 Actuator](#)

DANGER

**Fraudulent
Banking
Instructions**

Be advised that Hayward/IMG has not changed wire transfer instructions or banking details for more than 10 years.

If you receive any instructions of change from our normal wire transfer details consider this as fraudulent activity and re-confirm banking details with our Customer Service staff or Financial Department representatives.

We have experienced emails intercepted by "hackers" that have changed the banking instructions for wire transfers under our corporate email letter heads and staff names.

When in doubt check with Hayward/IMG representatives.
